

LibX - Motivation, Development, and Implementation

Annette Bailey & Godmar Back
October 3, 2006

LibX - Overview

- LibX is a localized Firefox extension that integrates access to library resources into the browser
- Motivation – why do we need it?
- Background – why did we build it?
- Demonstration – what does it do?
- Editions – how to get one for your library?

October 3, 2006

2

The Age of the Web

- Data from *OCLC 2005 Study* on “College Students’ Perceptions of Libraries and Information Resources”
- 89% of college students start information search with a search engine
 - vs 2% start with the library website

October 3, 2006

Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation

3

This Should Concern Us Because...

- Google* does not vet sources
- Google’s* page ranking algorithm does not reflect relevance
- Google* lacks metadata
- Google* does not provide access to all possible sources (e.g., print holdings)
- Google* does not know about local resources

* Substitute your favorite search engine here

October 3, 2006

Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation

4

Perceptions of Libraries vs Search Engines

- Libraries lead in
 - Trustworthiness & Credibility 77% to 23%
 - Accuracy 76% to 24%
- Search Engines lead in
 - Speed 90% to 10%
 - Convenience 84% to 16%
 - Ease Of Use 87% to 13%
 - Cost Effectiveness 71% to 29%
 - Reliability 63% to 37%

5

Our Challenge

- How can librarians provide users with resources that are
 - Accurate
 - Trustworthy
 - Complete
 - Accessible
- while providing the ease of use, integration, and availability of modern search engines?

October 3, 2006

Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation

6

Idea: a “library tool” for the Web

- Developed in summer of 2005
- A “virtual librarian” that guides users to library resources while they use the Web
- Library Tool
 - integrates access to library resources into the users’ “webflow”
 - integrated into browser

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 7 

LibX History

- Researched existing library toolbars & extensions, scripts, bookmarklets,...
- Found a number of toolbars
 - FASTJack, HALbar, etc.
- Web localization services
 - Library Lookup project (Bookmarklets, Greasemonkey scripts)
 - WAG The Dog project

However...

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 8 

LibX History (cont’d)

- Existing toolbars were not adaptable (or adaptable!) for use by other libraries
 - Or it wasn’t easy to do so
- Existing toolbars were limited in functionality
- We wanted an easily adaptable infrastructure on which to deliver a wide variety of services

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 9 

LibX

- Provides shortcut to library resources
- Uses Firefox browser extension technology
 - Integrated into the browser’s user interface
 - Installed on the client-side

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 10 

What LibX Provides

- Direct Access to Catalog(s) and Databases
 - Integrated toolbar
 - Smart context menu
- Direct access to OpenURL resolver to find appropriate copy
 - Directly via toolbar or indirectly through Google Scholar
- Localization
 - Research companion that “hints” at library resources
 - Support for COinS

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 11 

Catalog and Database Access

- Toolbar user interface
 - Supports single & multi-term searches
 - Not intended to replace “advanced search page” – captures common search pattern
 - Configurable to support multiple OPACs simultaneously
 - User can set display preferences
- Right-click context menu
 - Adapts to selections
- Predefined types
 - Millennium, iPac, Voyager, Aleph, Sirsi, SFX, Central Search, Article Linker, Google Scholar
- User-defined types
 - Local databases, etc.

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 12 

Demonstration 1

Toolbar, Context Menus

OPAC Toolbar

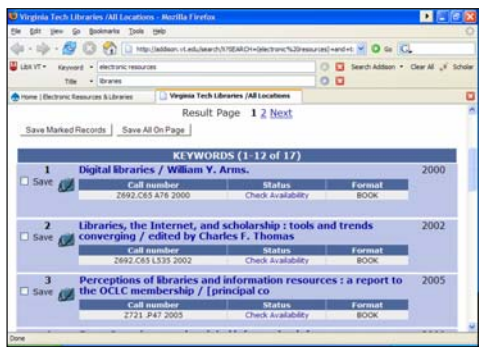

- Expands automatically for multi-term searches
- Offers commonly used search types:
 - Keyword, author, title, isbn, call number

20

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation

21

Display Preferences & Links

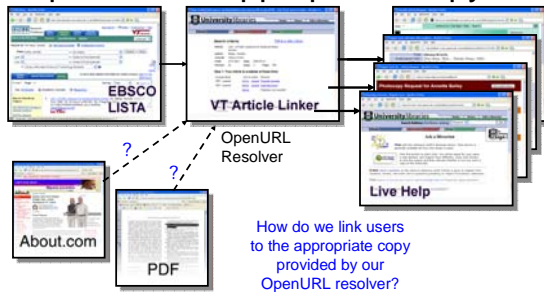

- Users can set preferences on how results should be displayed
- Libraries can configure links that are being displayed to users

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation

22

OpenURL & Appropriate Copy

Localization via LibX

- LibX enriches web pages before they are displayed to the user
- Inserts hyperlinked “cues”  that point at local library resources
 - E.g., amazon.com page points at library record of same book
- Implemented for: google.com, yahoo.com, bn.com, NY Times, Books in Print, ...
- Includes support for COinS (ocoin.info)

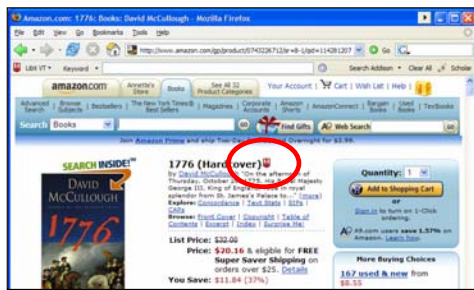

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 31 

Demonstration 3

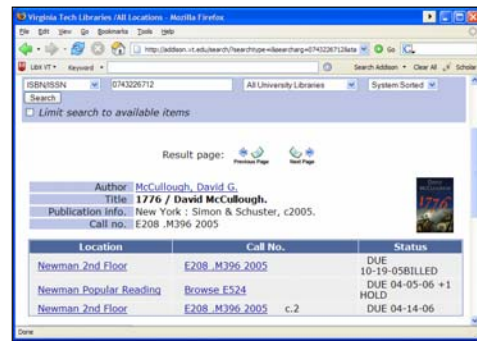

Localization using Cues

Cues on Amazon

One Year LibX

- VT Edition 1.0 went live Oct 13 2005
- 30 live editions as of today
- Downloaded & installed over 4,000 times – not counting test editions and not counting institutions who host it themselves.

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 37 VirginiaTech

Deployed Editions

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 38 VirginiaTech

How To Get A LibX Edition

- Options that are available today
 1. Download source and configure LibX yourself (libx.mozdev.org)
 2. Or, create a config file and send it to libx.org@gmail.com
 - Consult libx.org "Editions In Testing" page for examples – find libraries that use the same ILS and OpenURL resolver as you
 - We will work with you to get your edition up and running
- Go to <http://libx.org> for more information

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 39 VirginiaTech

Example

```

Naming and Version
libxversion=1.1

OpenURL Resolver Configuration

Remote Proxy, General Options & Logos
$proxy.type=wam
$proxy.url=helin.uri.edu
$proxy.name=PML Proxy Server

$libx.rewritescholarpage=true
$libx.supportcoins=true
$libx.sersolisbnfx=true
$libx.autolink=true
logoURL=chrome://libx/skin/pc-logo-large.jpg
emiconURL=chrome://libx/skin/pc-logo-16.jpg
emdescription=Toolbar for Phillips Memorial Library users
$libx.millennium.keywordcode=X
$adaptedby=Beatrice R. Piliam bpiliam@providence.edu
    
```

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 40 VirginiaTech

The LibX Development Process

- Uses "agile" model that mixes development & testing
- Test editions are always built with latest version of code base
- But only tested builds are offered to users!

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 41 VirginiaTech

Upcoming Features

- Currently: LibX Team Member is involved in (re-)building every edition – huge bottleneck
- Received IMLS National Leadership Grant to support the development of LibX
- Edition builder interface
 - Goal: develop a wizard-type web interface where libraries can build a LibX edition interactively
 - Will need testers in the community
- Create a LibX plug-in for Internet Explorer

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 42 VirginiaTech

Give Us Feedback

- Send us your feedback if you're already using LibX or plan to use it
 - How do you like the user interface? What could be better/different/customizable?
 - What resources should we support out of the box?
 - Where would you like to see cues?
 - What other services (unAPI, etc.) would you like to see in LibX?
- Subscribe to our mailing list if you are interested in LibX's development

Additional Material

LibX & Privacy

- Key goal: protecting LibX users' privacy
- Users do not reveal more information than they would if they used the library catalog
 - Exception: Referrer URL
- Tenet: Do not run queries unless user explicitly clicks on a link
 - E.g., no automatic holdings checking if user visits amazon
- Trade-off Privacy/Convenience

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 46 

LibX & Security

- Firefox extensions are trusted
- Users must trust that extension is not malicious
- LibX does not support user-provided scripts
 - More secure than Greasemonkey
- Source code is available for anybody to inspect
- Future: sign extensions

October 3, 2006 Annette Bailey & Godmar Back: LibX - Motivation, Development, and Implementation 47
